

### **Short Description:**

Portable and reliable accessory for your SDI camera. Bring it with you to capture and share video using any computer with a USB port. No driver installation required – simply connect and capture!

:

### **49 Portable and reliable SDI capture accessory**

Bring it with you to capture 3G-SDI, HD-SDI or SD-SDI video and share using any computer with a USB port.

### **Full HD video grabber at 60 fps**

AV.io SDI supports resolutions up to 1080p and transfers uncompressed video to your computer at 60 fps with near-zero latency, letting you capture even the tiniest details with perfect clarity.

### **Captures high quality audio**

AV.io SDI has automatic audio resampling. For situations with surround sound or multi-lingual audio, you can choose which audio pair to capture.

## No driver installation required

AV.io SDI is the easiest SDI capture card you'll ever use. It doesn't need any special drivers installed on your computer - plug it in to your USB port and start using it right away. It's as simple as using a webcam! Windows, Mac and Linux operating systems automatically detect AV.io SDI ensuring compatibility with your favorite software.

## Application support

Works seamlessly with your favorite third-party applications like Skype, Adobe FMLE, VLC media player, Wirecast and Quicktime.

## Built to last

Like all Epiphan video grabber products, AV.io SDI is designed to be strong, durable and rugged enough for daily use (some of our products are even [used in space!](#)). AV.io SDI has robust, full-size connectors designed for reliable and repeated long-term use.
